Patient Engagement: Taking it to the Next Level is the theme of this year’s e-Health Sunday Symposium, which is designed to enrich your e-Health 2018 conference experience. We know that patients have a unique perspective as key stakeholders in the health system and that engaging them leads to better health outcomes, which is good for patients and good for the health system! Join us on Sunday to engage in discussion with patients and health leaders about best practices to inform your engagement efforts, pitfalls to avoid and ways to accelerate progress.

It will also look at public/private sector relationships and how to foster innovation in a public-sector market and debate large scale province-wide implementations vs small scale implementations in a provocative and informative debate style format. The session will also be challenged by the innovation theory of small scale community implementations as trials to build and learn from.</td>

PL03 - Big Ideas, Building from the Ground Up

This panel will spotlight healthcare start-ups new to the digital health industry. Key topics to be discussed include: How they came up with the idea; how the fundraising process worked, who supported them, and the challenges they encountered; how they entered the market and impediments they faced; what SOLUTIONS they think are feasible in the short and medium term; and how they can partner with others to succeed. It will also touch on how procurement, funding models or other innovation approaches can be used to actually foster young Canadian companies to thrive in this market.

PL04 - Workplace Wellness For A Better Bottom Line
In the digital health industry we are always trying to do what is best for others – specifically for the clinicians and the patients we serve. However, we often forget to manage our own wellness and self-care. The process of executing towards one of our goals that further advances our health care system can feel all-consuming. We often work long hours to achieve results, and when burnout sets in and productivity declines, passion is snuffed out by resentment, dread, and stagnation. In this presentation, Nova shares the 5 main workplace complaints along with the solutions for helping manage our own wellness. The audience will
learn to proactively identify red flags at work and use various techniques to create boundaries & prioritize self-care. This session will be helpful for leaders, employees, and individuals.

Nova’s actionable takeaways will help audience members get more out of their personal and professional relationships, while organizations will learn new ways to encourage wellness at work.

Speaker: Nova Browning Rutherford
