Welcome to e-Health 2019

Whether you are a conference veteran or a first-time attendee, we are delighted to welcome you to the e-Health 2019 Conference in the beautiful city of Toronto.

This year's conference is focused on "Celebrate, Grow & Inspire Bold Action in Digital Health" – and showcases the innovation and successes of Canada's digital health journey.

One of the greatest perks to the e-Health experience is the education and networking opportunities, with top minds and talent from the digital health community. To facilitate this, e-Health will break down walls and move toward a completely open concept space. By removing barriers between the tradeshow floor, sponsors, exhibits and plenary rooms,

delegates will be able to move freely between conference sections and ensure they don't miss a thing.

Our venue this year is the Beanfield Centre, one of Canada's greenest conference centres and located on the grounds of the iconic Exhibition Place in Toronto, Ontario. The 160,000 square foot facility features 100% green power from renewable sources and incorporates today's most advanced technological innovations.

We hope that you find this year's conference an inspiring and dynamic way to learn, share and connect with your peers. We look forward to spending time with you over the next four days and thank you for joining us at e-Health 2019.

Conference Hosts

Formerly COACH: Canada's Health Informatics Association

Digital Health Canada

www.digitalhealthcanada.com

Digital Health Canada (Formerly COACH: Canada's Health Informatics Association) connects, inspires, and educates the digital health professionals creating the future of health in Canada. Our members are a diverse community of accomplished, influential professionals working to make a difference in advancing healthcare through information technology.

Digital Health Canada fosters network growth and connection; brings together ideas from multiple segments for incubation and advocacy; supports members through professional development at the individual and organizational level; and advocates for the Canadian digital health industry.

Canadian Institute
for Health Information

Institut canadien
d'information sur la santé

Canadian Institute for Health Information (CIHI)

www.cihi.ca

The Canadian Institute for Health Information (CIHI) is an independent, not-for-profit organization that provides essential information on Canada's health systems and the health of Canadians. We provide comparable and actionable data and information that are used to accelerate improvements in health care, health system performance and population health across Canada.

Our stakeholders use our broad range of health system databases, measurements and standards, together with our evidence-based reports and analyses, in their decision-making processes. We protect the privacy of Canadians by ensuring the confidentiality and integrity of the health care information we provide.

Canada Health Infoway (Infoway)

www.infoway-inforoute.ca

Infoway helps to improve the health of Canadians by working with partners to accelerate the development, adoption and effective use of digital health across Canada. Through their investments, Infoway helps to deliver better quality and access to care and more efficient delivery of health services for patients and clinicians.

Sunday Workshop

Partnering to Design Together – An Innovative Workshop with Patients

Sunday, May 26, 2019 | 09:00 - 16:00
 Beanfield Centre, Room 201AB, Second Level
Ticketed Event - SOLD OUT

'Partnering to Design Together' will connect digital health innovators with patients to explore new techniques and resources through 'design thinking'. Design thinking approaches complex problems with the philosophy that solutions should be created with, and not just for, end-users. Guided by the Hacking Health team, participants will adopt a design thinking mindset, as they identify problems, create innovative solutions and present ideas to the Hacking Health panel to be developed.

Key Features:

- Learn from and network with industry-leading experts, health enthusiasts and patients
- Collaborate with colleagues from different disciplines to develop healthcare innovation
- Increase knowledge and awareness of design thinking and patient-centred design
- Develop and own a refined statement about a health innovation need and desired outcome for a specific patient

Tradeshow Highlights

Lounge Areas

Lounges located on the main floor of Beanfield Centre will allow delegates to power up your mobile devices at no charge, while networking with conference delegates and connecting to e-Health exhibitors.

e-Posters

e-Poster presentations are available for viewing in POD 8 & 9 during tradeshow hours, Monday, May 27 and Tuesday, May 28. If you would like to hear more about the presentations, please refer to the e-Poster session schedule available via the e-Health 2019 mobile application for details.

Showcase

The Showcase has been an integral part of e-Health since 2007. Building on the outstanding success of the provincial success stories component, introduced in 2014, we will again be featuring some of the great innovations and collaborations between the public and private sector.

Attend a success story demonstration to hear how jurisdictions have implemented innovative e-Health solutions.

Start Up Zone

The Start Up Zone made its debut at the e-Health 2016 Conference and is designed to feature new and innovative start-ups and medium-sized companies that are using emerging technology and new delivery models to improve healthcare in Canada.
