E-HEALTH 2023 OPENING KEYNOTE

The Role of Digital and Technology on Our Future Workforce: Reinvention to build a future-ready healthcare workforce

May 29 | 8:30 AM – 10:00 AM

Kaveh Safavi, M.D., J.D., is a senior managing director at Accenture where he is responsible for leading, developing and driving a growth strategy that differentiates Accenture's offerings for providers, health insurers, and public and private health systems across the globe.

This presentation is sponsored by accenture

E-HEALTH 2023 CLOSING KEYNOTE

The digital health perspective: Inequality in the health care system and solutions for equity-deserving populations

May 30 | 4:00 PM – 5:00 PM

Dr. James Makokis leads one of North America's most progressive family medical clinics serving both LGBTQ2S and First Nation peoples from all over Canada. He is a national and internationally recognized leader and author in the area of Indigenous health and transgender health. Dr. James Makokis focuses on bringing awareness to racial and gender equality within the healthcare system. It is clear that the current health care system needs to change. He will share his unique experience of growing up in a segregated First Nation Community in Northern Alberta and his experience as a doctor at Kehewin Health Centre, North East of Edmonton, Alberta. He will teach the history of how we got to where we are now and identify strategies on what still needs to be improved for the different types of circumstances to increase the health of equity-deserving populations.

PLENARY

Working together to advance a modernized health system
May 29 | 4:30 PM – 5:30 PM

Recent events have drastically changed Canadians' expectations around health data and the ability to use it for clinical care and health system decision-making. The status quo isn't good enough. Patients and clinicians require health data to make informed decisions about care. Health policy- and decision-makers need access to data to ensure that our health systems function efficiently and with the right resources. Canada needs demonstrable leadership around the big issues in the health data landscape, such as modern data governance, data sharing across organizations and jurisdictions, and approaches to better partner with industry. The acceleration and progression of this imperative require skilled resources, coordination, strategic partnerships and a collective commitment to a modernized future for digital health and data interoperability in Canada.

This session will highlight the efforts of three national organizations—Canada Health Infoway, Canadian Institute for Health Information, and Digital Health Canada—that are collaborating with one another and with federal, provincial, and territorial governments and other key stakeholders to advance the vision of a modern health system based on a foundation of interoperable health data.

Panellists: Cassie Frazer, Anne Forsyth, Mark Casselman, Abhi Kalra

E-HEALTH 2023 TUESDAY PLENARY PANEL

Embracing the possibilities in ML/AI innovation
May 30 | 8:30 AM – 9:30 AM

Machine learning and artificial intelligence (ML/AI) along with augmented reality are shaping and disrupting health systems across the globe. In this exciting plenary session, we will be talking to industry leaders at the forefront of this new era to share their real-world experience with implementing ML/AI in the healthcare setting, debunk the myths about smart technology, and bring a pragmatic lens on how governments and healthcare organizations can embrace this innovation in a safe, trusted, and sustainable manner.

Panellists: Aloha McBride, Rachel Dunscombe, Andrea Marazzi, Dr. Bradly Wouters, Nadia Sapiro
